Education

University of California, Santa Barbara — Santa Barbara, CA

Bachelor of Science in Computer Science, GPA: 3.86; Dean's Honors (College of Engineering, 3 consecutive quarters)

- Relevant Coursework: Data Structures & Algorithms I & II, Machine Learning, Computer Networks, Computer Vision, Advanced Applications Programming, Optimization Foundations, Automata & Formal Languages
- Technology Management Certificate; Coursework: Entrepreneurship, Business Strategy, Marketing

Cabrillo College — Aptos, CA

A.S. Computer Science, A.S.-T Mathematics, A.S.-T Physics, A.A. Liberal Arts; GPA: 3.98

- Honors Scholar; graduated with High Honors

Projects

Plannr | *SwiftUI, Python, FastAPI, SQLite, Google Calendar API, Gemini* — Jan. 2026 – Present

- Built an iOS application that converts course syllabi into structured deadlines and synchronizes them with Google Calendar
- Developed a FastAPI backend for PDF and DOCX parsing, date extraction, and structured course data; implemented Google OAuth 2.0 and Google Calendar API integration
- Led Agile development and built class management, calendar resynchronization, Stripe payment, and deployment workflows for a production-facing beta
- Launched a 9-day beta campaign that converted 80 storefront visits into 3 paying customers, achieving a 3.75% conversion rate with $0 in paid advertising spend

Agentic KMS – SpaceComputer | *TypeScript, Node.js, Cedar, WebAssembly, Orbitport* — Sep. 2026 – Present

- Lead a five-person UCSB senior capstone team developing a policy-controlled key management system for AI agents in collaboration with SpaceComputer
- Developed a Cedar-based authorization layer that evaluates agent identities, actions, and resource permissions before allowing cryptographic operations through SpaceComputer's Orbitport SDK
- Implemented an end-to-end prototype with live KMS encryption requests, policy-based access denial, structured audit logging, and a web dashboard for monitoring authorization activity

Rankle | *Next.js, React, TypeScript, Supabase, PostgreSQL, Vercel* — Aug. 2026 – Present

- Built a daily social ranking game where users organize items into tiers, submit rankings, compare results, and share tier lists with friends
- Designed a PostgreSQL and Supabase data model for accounts, guest sessions, tier lists, submissions, results, sharing, and scheduled content
- Implemented row-level security and automated CI covering application builds, unit tests, database migrations, SQL security tests, and Playwright end-to-end tests

Experience

Crew Member & Grocery Section Lead — June 2022 – Present

Trader Joe's — *Santa Cruz / Goleta, CA*

- Manage end-to-end ordering and inventory strategy for the grocery section, using sales trends, demand patterns, and shelf performance to guide purchasing decisions
- Contributed to roughly 10% year-over-year growth in grocery sales through inventory, assortment, and merchandising decisions while serving as grocery section lead

Math & Physics Tutor — Aug. 2024 – May 2025

Cabrillo College Physics Learning Center — *Aptos, CA*

- Tutored students in mathematics, mechanics, and introductory physics by translating technical concepts and multi-step problems into clear explanations

Technical Skills

Languages:	Python, Java, C++, C, Swift, TypeScript, JavaScript, SQL, HTML/CSS, LaTeX
Frameworks & Libraries:	React, Next.js, Node.js, SwiftUI, FastAPI, Spring Boot, NumPy, pandas, Matplotlib, Cedar, WebAssembly
Databases & Platforms:	PostgreSQL, MongoDB, SQLite, Supabase, Convex
APIs & Services:	REST APIs, Google Calendar API, Google OAuth 2.0, Stripe, Gemini API, Resend, Orbitport SDK
Cloud & Infrastructure:	AWS, Google Cloud Platform, Cloudflare, Vercel, Render, Dokku
Developer Tools:	Git, GitHub, GitHub Actions, Docker, Playwright, Sentry, Figma, Xcode, VS Code
